Should it be expected, in exceptional cases, that that period will be exceeded, consultation will take place with SURFmarket at least five (5) working days beforehand regarding the reason for this and the necessary duration of the period during which there will be no access.
- Publisher may temporarily suspend access to the Licensed Material without announcing this in advance if repair work is necessary as a result of an emergency that has occurred. Publisher will immediately inform SURFmarket of this event, giving the reasons. If the said repair work takes longer than one (1) working day, SURFmarket will be entitled to monetary reimbursement of a proportionate amount of the total Licence Fee.
- The Publisher reserves the right at any time to withdraw from the Licensed Material any item or part of an item for which it no longer retains the right to publish and for which the Publisher has been unable to secure the provisions as set out in Clauses 9.1 and 9.2, or any item or part of an item for which the Publisher has reasonable grounds to believe it infringes copyright or is defamatory, obscene, unlawful or otherwise objectionable. The Publisher will give written notice to the Institution of such withdrawal. If the withdrawn material represents more than five per cent (5%) of the Licensed Material the Publisher will make a pro rata refund of part of the Fee to the Institution, taking into account the amount of material withdrawn and the remaining term of the Agreement.
- Publisher undertakes to provide the SURFmarket and the Institutions with statistics on utilisation, free of charge, according to the standards of Project Counter (<http://www.projectcounter.org>).

Definitions

"Text and Data Mining" means to perform extensive automated searches of Content, including data embodied therein, images, figures, interactive content and videos, the sorting, parsing, addition or removal of linguistic structures, and the selection and inclusion of Content into an index or database for purposes of classification or recognition of relations and associations.

"TDM Output" means the result of any Text and Data Mining activity or operation, capable of fixation, reproduction and/or communication in any form, including without limitation the creation of an index, reference, abstract, relative or absolute description or representation of Content, an algorithm, formula, metrics, method, standard or taxonomy describing or based on Content, a relational expression or measurement, whether scalable or not, of Content, extraction, alternative representation or translation, expression or discussion of any extracts from mined Content, whether in the form of a direct extraction or a representation in any form which is based on Content.

Where required, mount, load and integrate the results on a server used for the Institution's text-mining system to evaluate and interpret the TDM Output.
- (b) store electronic copies of the Content on its computer or server as necessary solely to ensure efficient use on a TDM project.
- (c) use TDM Output as part of original research solely carried out by its Authorized Users and describe or otherwise reproduce extracts and quotations from TDM Output as part of original works of authorship, e.g. research reports, research papers and research articles.
