Detailed list of Licensed Material with publishing rights

This list of eligible titles is subject to change, due to titles being added and titles which cease. An up to date list of eligible titles can be found at this URL, marked with a 'Yes' in the column 'Open Select (optional Gold OA available)': <https://authorservices.taylorandfrancis.com/journal-list/>

In addition to this online list, the Publisher agrees to send an up to date list of eligible journal titles in an Excel format directly to SURFmarket.

Terms and Conditions for Open Access Publishing for Authors

1. Eligible authors

Eligible Authors are defined as teaching and research staff employed by one of the Institutions, as well as students enrolled with one of the Institutions, while the research described in the Article was performed ('Affiliated Authors'), and who are the Corresponding Author of an article of Eligible Article Type in an Open Select journal. The method for determining if an author is an Affiliated Author is described below.

Corresponding Author shall be the author who identifies themselves as such on submission of their article according to scholarly norms, and is identified as such in the published article. Authors are only eligible once they have signed the then current open access publishing agreement with Publisher. Currently this agreement refers to the Creative Commons Attribution License 4.0 or the Creative Commons Attribution Non-Commercial 4.0 License or the Creative Commons Attribution Non-Commercial No Derivatives License 4.0 for a few journals which can be seen here:
<http://creativecommons.org/licenses/by/4.0/legalcode>
<https://creativecommons.org/licenses/by-nc/4.0/legalcode>
<https://creativecommons.org/licenses/by-nc-nd/4.0/legalcode>

2. Eligible Article Types

All 'core content' articles are eligible to be made open access under this agreement, where core content is defined as mainly articles and review papers, nearly all peer-reviewed. An updated list of core content article types will be sent to SurfMarket twice per year. 'Non-core' content is excluded for eligibility.

3. The parties' obligations

The parties have the following obligations regarding the Open Access Publishing:

- Publisher shall not levy article publishing charges directly on Authors who have identified themselves and whose eligibility has been verified;
- Publisher shall list and include the Institutions in the publishing process, enabling Authors to identify themselves as such. See Appendix;
- Articles will be selected for publication in Open Access by default if the email address is part of the list of domain names of the Institutions and the affiliation to the Institution is recognised.
- Authors will be deemed Affiliated Authors if the email address they provide to the Publisher is part of the list of domain names of the Institutions provided in Appendix 1, or if the Address they provide to the Publisher contains one of more of the common variations provided in Appendix 2.
- If an author has not submitted an article for publishing in open access, the Institution will be able to request the article to be published in open access until three months after acceptance.
- When articles are accepted for publishing and the author is given a choice, the Publisher will clearly indicate that Open Access is the default option of the funding body.
- Institution shall ensure that Authors shall identify themselves as being eligible in the course of the Publisher publishing work-flow. In case authors have not identified themselves as being eligible, once an article has been published in a subscription Journal, the author is not eligible anymore to publish the article as Open Access under the terms of this agreement;
- The parties might change this identifying process and amend this Agreement accordingly, when the changes and amendments are agreed by both parties.

Text and Datamining

- Publisher recognizes that TDM offers researchers a powerful tool which allows them to make connections between otherwise unrelated facts, and as a result inspire them to form new hypotheses and adopt new approaches. In order to accommodate this approach Publisher facilitates licensed TDM.
- TDM can be executed by researchers whose host institutions subscribe to our journal content. Publisher mediates licensed TDM requests to ensure access-and-use is balanced with Publisher's duty to assure site security and service levels, and that the proposed TDM is for non-commercial purposes. (Open Access content published under a CC BY license may of course be reused for a commercial purpose, including commercialized TDM.)
